

Chip It Good

Stashbuster #12

Chip It Good

Introduction

Are you looking for a fun quilt? Are you wanting to use up your scraps? Do you have remnants of a project and you don't know what to do with them? In this Stashbuster, we are taking the potato chip block and supersizing it. And I have lots of tips and tricks for making it fast and easy. To watch the video for this pattern, click on the QR code.

Components

THE CHIP

It uses only one sized piece at $2\frac{1}{2}'' \times 4\frac{1}{2}''$. And they finish at $2'' \times 4''$. Which means that it's twice as wide as it is tall.

THE STRIPS

For the size quilt you want to make (see following charts), cut the number of strips x WOF (wide of fabric).

THE CENTRE

For each size of quilt, there is a different centre block so that you get the proper final proportions you want. Each is sewn long side to long side to make a column. (Note that the king size orientation is different when assembling.)

ASSEMBLY

Starting with the left and right sides of the column, add the number of chips listed in the chart you are following. Then add the top and bottom rows. Continue this process a la "Courthouse Steps" until finished size is acquired.

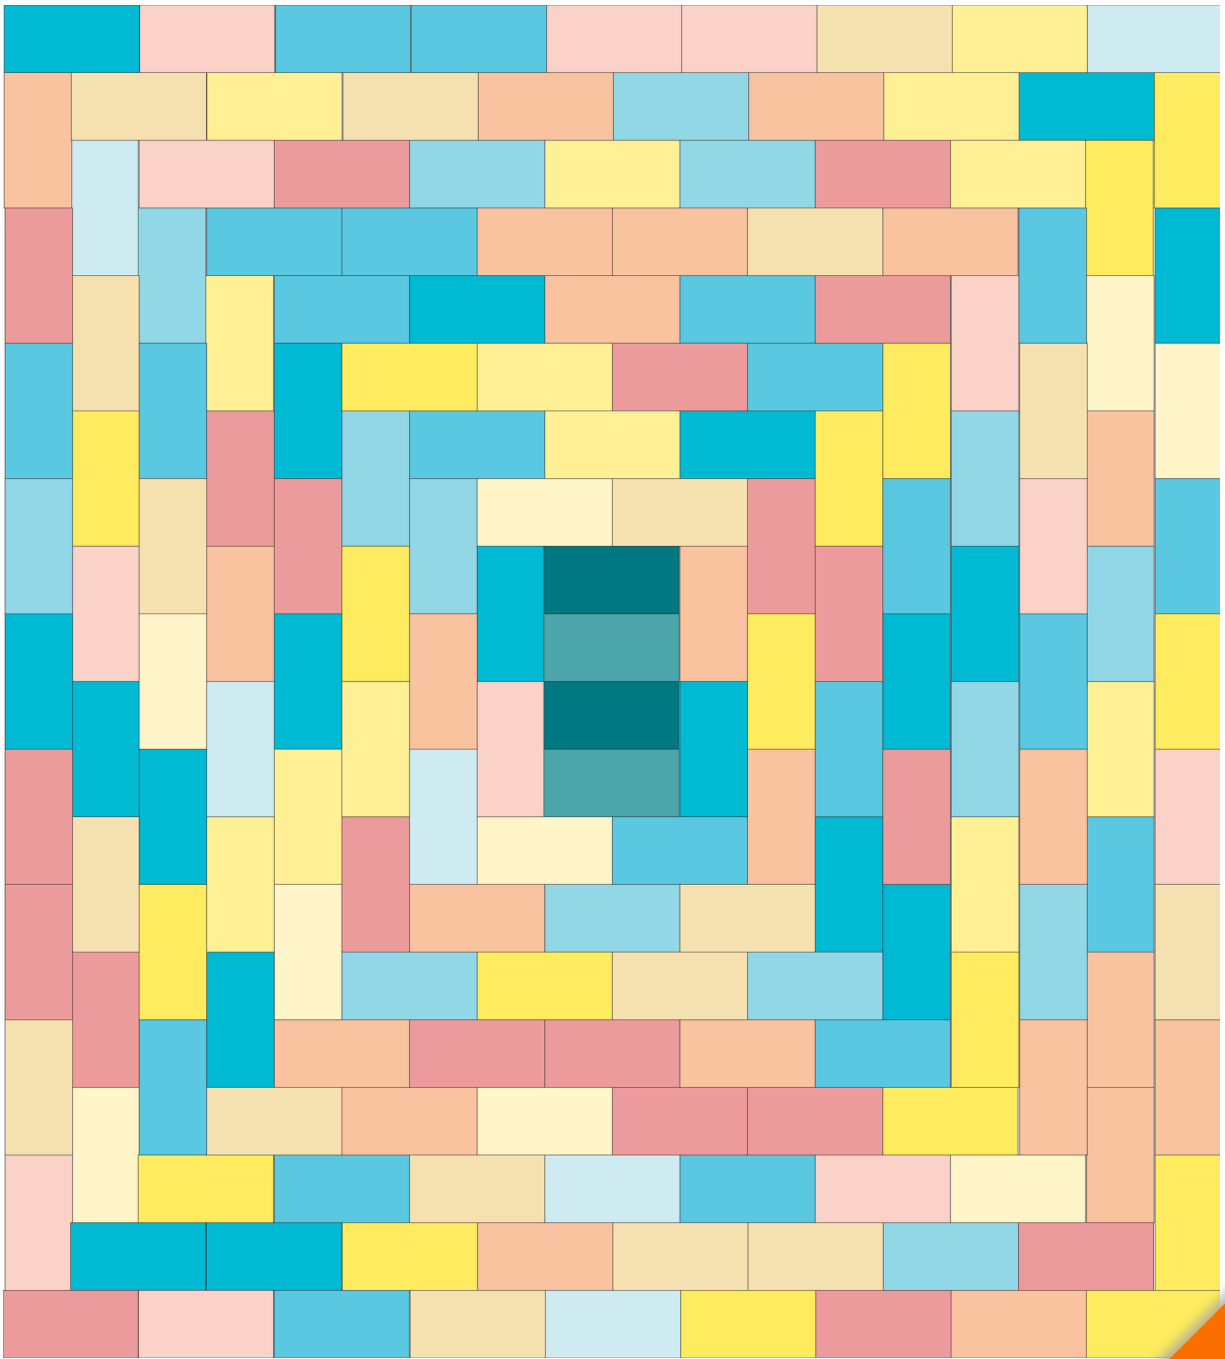

VARIATIONS and QUILTING

Are discussed in the linked video (QR code).
